Election/Restrictions

1. Applicant's election without traverse of claims 3-19 in the reply filed on 1-27-2006 is acknowledged.
2. Claims 1 and 2 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in a telephone interview with Applicant's representative, Brian Hennessey, on 3-15-2006.

EXAMINER'S AMENDMENT

3. Claims 3-19 are allowed.
4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
5. Authorization for this examiner's amendment was given in a telephone interview with Brian E. Hennessey (Reg. 51,271) on 3-15-2006. Applicant's representative, Brian Hennessey, agreed to the following changes without prejudice:

Claim 1 is **cancelled**.

Claim 2 is **cancelled**.

Allowable Subject Matter

6. The following is an examiner's statement of reasons for allowance: upon close review of the claims, the prior art, and applicant's remarks it appears that the allowance of claims 3-19 are appropriate.

The transmitter-receiver of the TDMA/TDD type (DECT digital cordless telephone) which includes a phase control loop integrated circuit of U.S. Patent No. 5,598,405 by Hirose is functionally equivalent to the claimed communication equipment and claimed phase lock oscillator because the transmitter-receiver transmits information by using an output signal of a phase control loop integrated circuit which has a phase-locked loop including a reactive element and whose oscillation frequency varies according to an input signal and a PLL of the high-speed lock up type is employed in the circuit to detect a lock up time required for changing the role of the circuit. Although, Hirose teaches a phase control loop integrated circuit in a transmitter-receiver (col. 2, lines 1-47; col. 3, lines 36-47), Hirose fails to teach triggering the reactance of a reactive element at a first instant which succeeds the instant preceding the limit that the phase-locked loop can maintain its lock state.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
